

Example Document

by

Nom de Plume

This is an example document of the template, showing its options that can be toggled using the YAML metadata. `Phone`, `email`, `address`, and `url` are optional, replace their value with an empty string (`"`) if they're not used to suppress them in the output.

Options available:

- `title`: Title of the document in the header
- `author`: Author's (pen)name
- `booktitle`: Title of the book
- `phone`: (Public) phone number
- `email`: (Public) email address
- `address`: (Public) address
- `url`: Link to a website

In case the `image` directory contains a `logo` file that file is typeset in the upper right corner of the letter page (first page). If not, it is replaced by the author's name.

Part I - The Reckoning

This is a template for a scenario of a fiction book. This helps to order the happenings within the book and make it more digestable for potential publishers and readers.
